

Ergonomic Support Arms

Suitable for all Delvo CE-marking screwdrivers (gripping ϕ 30 ~ 39.5mm)
preventing the worker from fatigue and injuries
with the highest quality and durability - 100% Made in Germany.

Articulated model YSA-AR15-400/400

The light support arm can be swiveled and moved almost like the human arm.

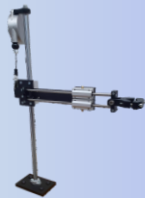

- Fast and precise with a high degree of free movement across the entire work area
- Ideal for limited space also
- Large selection of optional tool holders allows gripping of almost any hand-held tool
- Ensures gentle, safe and precise positioning of the tools
- Smooth-running ball bushings guarantee precise vertical and horizontal tool positioning
- Fixed tools minimize operator influence and thus increase accuracy

model	torque	Tool clamping range	Stroke	Column height
YSA-AR15-400/400	15 Nm	28 - 44 mm	0 - 400 mm	700mm

Linear model YSA-LI15-200/500

The light support arm ideal for guiding the tool with precise angles.

- Absorbing the reaction forces and vibrations, as well as the weight of the machine.
- Ideal for limited space also
- Large selection of optional tool holders allows gripping of almost any hand-held tool
- Smooth-running ball bushings guarantee precise vertical and horizontal tool positioning

model	torque	Tool clamping range	Stroke	Column height
YSA-LI15-200/500	15 Nm	28 - 44 mm	317 - 519 mm	700mm

Telescopic carbon models YSA-TE15

Acquires torque / reaction moments perpendicular to the arm axis

- Light & simple design
- Durable and maintenance-free carbon tubes
- Ergonomic work without restricting the flexibility of a hand-held tool

model	torque	Tool clamping range	Stroke
YSA-TE15-200/600	15 Nm	28 - 44 mm	414 - 664mm
YSA-TE15-600/1000	15 Nm	28 - 44 mm	510 - 1120 mm
